

FCC:I ask that you refuse any petition from local airwave broadcasters to block the spectrum of services offered by satellite radio.

As a satellite radio subscriber I am much more satisfied with the timeliness, accuracy and thoroughness of satellite radio's local traffic and weather services for my own market (NY). I also find it helpful to be able to listen to detailed weather reports for other cities to which I may be traveling.

I ask you to not limit the content of satellite radio.

Terry G. Vavra
